

Self-Attestation of Compliance with the US Framework for Nucleic Acid Synthesis Screening

Dynegene Technologies, a provider of synthetic nucleic acids, hereby submits this attestation. We recognize that U.S. federally funded life sciences entities and funding agencies rely on this document when procuring gene synthesis, oligo synthesis services, or related products.

Dynegene Technologies self-attests to full compliance with the **US Framework for Nucleic Acid Synthesis Screening** (the "Framework"). In particular, we:

- Screen customer orders for sequences of concern in accordance with the Framework;
- Verify the legitimacy of all customers and intended end uses;
- Maintain appropriate records consistent with Framework guidance.

Any questions on Dynegene Technologies' biosecurity practices may be addressed to info2@dynegene.com.

We further commit to promptly update this attestation by **January 1 of each year** or sooner if contact details change, and to notify all federally funded customers and funding agencies within **72 hours** if Dynegene Technologies ceases to adhere to the Framework.
